SUMMARY

Computer Science undergraduate seeking a fresher role to apply my knowledge, problem-solving abilities, and technical skills while contributing to organizational success.

EDUCATION

B.Tech – Computer Science and Engineering (IoT) Malla Reddy Engineering College for Women, Maisammaguda	2023 – 2027
Intermediate – Board of Intermediate Education Mahatma Jyothiba Phule Telangana Backward Classes Welfare Educational Residential Institution Society	2021 – 2023
Secondary School Certificate (SSC) Kennedy High School	2021

PROJECTS

CROP RECOMMENDATION USING RANDOM FOREST ML ALGORITHM

Developed a machine learning model that recommends the most suitable crop based on soil parameters (NPK values), temperature, humidity, pH, and rainfall. Implemented the Random Forest algorithm to achieve high accuracy and robustness. Processed and cleaned real-world agricultural datasets, performed feature analysis, and deployed the model for practical use in smart farming applications.

PLANT HEALTH ANALYSIS THROUGH IMAGE PROCESSING

Designed a system to detect plant diseases using image processing and machine learning techniques. Utilized CNN models to classify plant leaf images and identify common diseases with high accuracy. Preprocessed images using OpenCV and trained the model on a labeled dataset. Aimed to assist farmers in early disease detection and improved crop management.

PLANT DISEASE PREDICTION AND FERTILIZER GUIDE

Developed a web-based application using Machine Learning and CNN to detect plant diseases from leaf images and recommend suitable fertilizers. The system helps farmers identify diseases early and improve crop health through accurate predictions and treatment guidance.

FARMER-FRIENDLY MOBILE APPLICATION FOR CROP HEALTH

Developed a mobile application that helps farmers monitor crop health by identifying plant diseases from leaf images and providing fertilizer recommendations. The application supports early disease detection, improves crop productivity, and assists farmers in making informed agricultural decisions using AI and Machine Learning technologies.

TECHNICAL SKILLS

Programming Languages: Python, HTML, Java (Basics), CSS

Tools: ChatGPT, Claude, Meta AI, Gemini, Postman API

Core Concepts: Database Management Systems

Languages: English, Hindi, Telugu,

CERTIFICATIONS

CLA: Programming Essentials in C

Infosys Certifications (6 courses completed)

Cisco Certifications (10+ courses completed)
